RECEIVED

OCT 13 1981

PUEBLO OF LAGUNA
GOVERNOR'S OFFICE

October 12, 1981

The Honorable Harry D. Early
Governor, Pueblo of Laguna
P.O. Box 194
Laguna, New Mexico, 87026

Dear Governor Early:

Accompanying this letter are data for the drill holes on the current Jackpile mining lease. Although the complete set of data is not ready for you, Mr. Lynn suggested that I deliver to you that which is completed to date.

The data for the off-lease drill holes were submitted to the Pueblo during August through December, 1979.

The material that is being submitted at this time consists of the following:

- 41 volumes of drill hole data for 24,037 holes. Computer printout.
- 1 volume of one-line index listing of the drill holes. Computer list.
- 1 Index Map of the Drill Hole Maps, scale 1 inch = 1000 feet.
Mylar original.
- 42 Drill Hole Maps, scale 1 inch = 100 feet. Computer plotter originals.
- 43 Drill Hole Maps, scale 1 inch = 50 feet, of selected crowded areas of the 100 scale maps. Computer plotter originals.
- 7 Final Pit Bottom Maps showing the final open pit bottom elevations of the Jackpile and Paguate pits, scale 1 inch = 100 feet.
Mylar reproductions.
- 1 Computer tape, Anaconda File Number 1855, from which the 41 volumes of drill hole data were printed and the maps were plotted, copied from the Geologic Data Base, with detailed information necessary to read the tape on a computer.

Not yet completed, but to be delivered as completed, are:

Plan maps of underground workings, showing the areas excavated.

Topographic maps of the current surface of the lease.

Major Ranch drill hole data.

Preparation of the Major Ranch drill hole data will require some months to complete because it is not in as accessible a form and its collection will be more tedious and involved.

All of the information herein submitted was reproduced from the current Geologic Data Base, as used extensively by Anaconda. Although Anaconda has maintained the Data Base, we cannot make representations or warranty as to the accuracy of the data therein.

Respectfully,

cc: R.D. Lynn
